EPA Vehicle Class: Standard Pickup Truck

Assembly: Saltillo Assembly Plant, Coahuila, Mexico

RAM INTRODUCES “NEW CREW” OF ULTIMATE HEAVY DUTY PICKUP TRUCKS: 2010 RAM 2500 AND 3500

Ram continues to raise the bar with the boldest, most powerful and capable pickup truck lineup on the planet with the introduction of the all-new 2010 Ram Heavy Duty lineup, offering first-time innovations and features along with new standards of strength, utility and driveability.

The backbone of 2010 Ram Heavy Duty pickups is a hydro-formed, fully boxed frame with advanced torsional rigidity and stiffness. A coil-spring suspension setup is used up front, while the multi-leaf spring design is maintained in the rear for heavy-duty capability. Front and rear shocks and springs are tuned for optimum ride quality and capability.

Customers in the heavy-duty segment have a range of needs, and most of them involve high levels of capability. The new 2010 Dodge Ram 2500 and 3500 are designed to deliver a total package:

- Increased Gross Vehicle Weight Rating (GVWR) on 2500 4x4 crew cab diesel models to 9,600 pounds from 9,000 pounds
- Increased Gross Combined Weight Rating (GCWR) on 3500 dually models with diesel, auto transmission and 4.10 rear axle to 24,500 pounds from 24,000 pounds
- Increased GCWR on 3500 4x2 models to 24,000 pounds from 23,000 pounds
- Increased front Gross Axle Weight Rating (GAWR) on several models:
 - To 5,500 pounds from 5,200 pounds on diesel 4x4 pickups
 - To 5,000 pounds from 4,700 pounds on diesel 4x2 pickups

Suspension upgrades and larger front axle U-joints, combined with increased front GAWR, result in increased front-weight carrying capability – a must for larger snowplows.

(continued on next page)

NEW FOR 2010

- Available for the first time in a crew-size cab model
- Choice of legendary diesel- and gasoline-fueled powerplants
 - Available 6.7-liter Cummins® Turbo Diesel produces 350 horsepower (261 kW) at 3,000 rpm and 650 lb-ft. of torque (881 N·m) at only 1,500 rpm. The 6.7-liter meets the most stringent of 50-state emission requirements and includes a segment-exclusive standard exhaust brake
 - Standard 5.7-liter HEMI® V-8 delivers 383 horsepower (286 kW) at 5,600 rpm and 400 lb.-ft. of torque (542 N·m) at 4,000 rpm and features variable-valve timing for greater efficiency and performance
- Ride greatly improved over previous generation with re-tuned suspension components
- New C-pillar with fluid-filled hydro mounts improves driving dynamics
- Handling of fully loaded vehicle greatly improved over previous generation with new suspension tuning

2010 RAM 2500/3500 HEAVY DUTY OVERVIEW

- Ram Heavy Duty 3500 with dual-rear-wheels, diesel engine, automatic transmission and 4.10 rear axle has an increased Gross Combined Weight Rating (GCWR) of 24,500 pounds from 24,000 pounds
- Max Tow Package GCWR increases to 25,400 pounds (late availability)
- Ram Heavy Duty 3500 offers superior towing capability at 17,600 pounds and a maximum payload of 5,150 pounds
- Ram Heavy Duty 2500 Gross Vehicle Weight Rating (GVWR) increases to 9,600 pounds from 9,000 pounds, a 600 lb. increase on crew cab and Mega Cab 4x4 models equipped with the Cummins Turbo Diesel engine
- Increased front Gross Axle Weight Rating (GAWR) of 5,500 pounds on 4x4 models equipped with the 6.7-liter Cummins Turbo Diesel engine allows for more front-weight carrying capability, including greater snowplow weights
- Class IV receiver standard on all Ram Heavy Duty models
- Premium front seats with heat and ventilation; heated rear seats; heated steering wheel; automatic temperature control; two-tone upholstery; memory seats, radio and mirrors; navigation; adjustable pedals and numerous infotainment options, including SIRIUS Backseat TV™ with three channels of programming, Uconnect Multimedia with a 30-gigabyte hard drive and an available first-in-segment 10-speaker surround-sound system
- Offered in three cab styles (regular cab, crew-size cab and Mega Cab) and two cargo-box sizes (6 feet 4 inches and 8 feet), single-and dual-rear-wheel configurations
- All-new integrated trailer brake controller, offered with trailer tow package, improves trailer braking and stability
- Available in five distinct trim levels – ST, SLT, TRX, Laramie and Power Wagon
- Dual-rear-wheel fenders (3500 dually only) are new for 2010 and are integrated into the box stamping providing a sleek aerodynamic appearance
- B20 package available to fleet customers only

Towing capability is a strong suit with the new 2010 Ram 2500 and 3500 pickups, with the only standard exhaust brake in the segment (diesel-equipped models). This feature prolongs brake life and provides confidence and safety when hauling heavy loads on downhill grades. Large front (360 mm) and rear (358 mm) brakes with integrated Anti-lock Brake System (ABS) increase brake life and braking stability.

An available integrated trailer brake control provides better driver control in towing situations. Trailer brake control information is conveniently displayed in the Electronic Vehicle Information Center (EVIC) which is standard on diesel models and available on gas SLT, TRX and Laramie models.

In addition, new 2010 Ram transmissions include Electronic Range Select, which enables the driver to manually limit the highest available transmission gear, allowing manual upshifts and downshifts based on road speed and engine speed. A tow/haul mode switch enhances tow capability while towing. Tow/haul mode is standard on both five-speed and six-speed automatic transmissions.

In terms of power, the new 2010 Ram Heavy Duty tops the charts with the legendary 6.7-liter Cummins Turbo Diesel engine, which produces 350 horsepower (261 kW) at 3,000 rpm and 650 lb.-ft. of torque (881 N•m) at only 1,500 rpm.

The most durable and reliable engine in its class, the 6.7-liter Cummins Turbo Diesel features standard oil-change intervals of 7,500 miles. It also has life-to-major overhaul intervals of 350,000 miles, providing more than a 100,000-mile advantage over the competition.

And it's as clean as it is durable. In order to meet stringent 2010.5 diesel emissions requirements, the Cummins 6.7-liter Turbo Diesel engine uses a diesel particulate filter (DPF) to virtually eliminate particulate matter emissions and an absorber catalyst to reduce oxides of nitrogen (NOx) by as much as 90 percent.

Backing up the 6.7-liter diesel is a choice of either a G56 six-speed manual transmission or a 68RFE six-speed automatic transmission. The six-speed manual has an ultra-low first-gear ratio, which makes it ideal for heavy hauling requirements, while the six-speed automatic offers ease of driveability and towing.

The other choice for 2010 Ram Heavy Duty customers is the standard 5.7-liter HEMI® V-8 gasoline engine, delivering 383 horsepower (286 kW) at 5,600 rpm and 400 lb.-ft. of torque (542 N•m) at 4,000 rpm.

The 5.7-liter HEMI comes standard with the heavy-duty 545RFE five-speed automatic. It offers Electronic Range Select and tow/haul capability that provide a unique shift schedule that minimizes gear hunting while towing heavy loads. It also provides automatic downshift capability while decelerating.

Ram Power Wagon returns for the 2010 model year, equipped with electric-locking front and rear differentials, electronic disconnecting sway bar, Bilstein shocks, 32-inch BF Goodrich off-road tires, underbody skid-plate protection, 4.56 axle ratio for hill climbing and a custom-built Warn® 12,000-lb. winch is accessible through the front bumper. The exterior has been enhanced with a new two-tone paint scheme and graphics package.

New dual-rear-wheel fender flares (3500 dually only) are now integrated into the sheet metal box stamping and offer an appearance that communicates quality and achieves improved aerodynamics.

Inside, the new 2010 Ram Heavy Duty offers abundant amenities, comfort and convenience. A new-for-2010 available center console features an upper bin that is large enough to hold a laptop computer (with an accessible power outlet), and a lower bin that accommodates hanging files. In addition, the console offers several other storage compartments.

2010 RAM 2500/3500 HEAVY DUTY OVERVIEW

New 2010 Ram 2500 and 3500 Mega Cab models retain their title of best-in-class interior room in the segment – including the largest, longest cab (143.2 cubic feet, 111.1 inches long); largest interior cargo volume (72.2 cubic feet); largest cargo volume behind rear seat (7.7 cubic feet); largest flat-floor load area (16.8 square feet); largest second-row leg room (44.2 inches); largest rear-door opening (34.5 inches wide, 35.5 inches high); largest rear-door open angle (85 degrees); and first-ever reclining rear seats (22- to 37-degree seat-back angle).

Expanding business and commercial work applications, the 2010 Ram 2500 is available in a Box-Off configuration. Combining “Ram-tough” power and strength with enhanced handling, safety and durability, Ram 2500 Box-Off successfully blends the needs of the commercial and heavy-duty pickup truck customer.

2010 RAM 2500/3500 HEAVY DUTY AT A GLANCE

- The New Crew: the 2010 Ram Heavy Duty is available for the first time in a crew-size cab model – providing Ram with a formidable entry in the highest-volume part of the heavy-duty pickup segment (approximately 50 percent)
- Cummins and HEMI®: Choice of legendary diesel- and gasoline-fueled powerplants
 - 6.7-liter Cummins Turbo Diesel produces 350 horsepower (261 kW) at 3,000 rpm and 650 lb-ft. of torque (881 N•m) at only 1,500 rpm. The 6.7L meets stringent 50-state emission requirements and includes a segment-exclusive standard exhaust brake
 - 5.7-liter HEMI V-8 delivers 383 horsepower (286 kW) at 5,600 rpm and 400 lb.-ft. of torque (542 N•m) at 4,000 rpm. Features Variable-valve Timing (VVT) for greater efficiency and performance
- Improved driving dynamics:
 - Ride greatly improved with re-tuned suspension components
 - New C-pillar with fluid-filled hydro mounts
 - Handling of fully loaded vehicle greatly improved with new suspension tuning
- Ram 3500 with dual-rear-wheels, diesel engine, automatic transmission and 4.10 rear axle has an increased Gross Combined Weight Rating (GCWR) of 24,500 pounds from 24,500 pounds
- Ram Heavy Duty 2500 Gross Vehicle Weight Rating (GVWR) increases to 9,600 pounds from 9,000 pounds, a 600 lb. increase on Crew Cab and Mega Cab 4x4 models equipped with the Cummins Turbo Diesel engine
- Increased front Gross Axle Weight Rating (GAWR) of 5,500 pounds on 4x4 models equipped with the 6.7-liter Cummins Turbo Diesel engine allows for more front-weight carrying capability including greater snowplow weights
- Premium front seating with heat and ventilation; heated rear seats, heated steering wheel; automatic temperature control; two-tone upholstery; memory seats, radio and mirrors; navigation; adjustable pedals and numerous infotainment options including SIRIUS Backseat TV™ with three channels of programming, Uconnect™
- Multimedia and an available first-in-segment 10-speaker surround-sound system
- Numerous storage options including in-floor storage
- Ram Heavy Duty 3500 offers superior towing capability at 17,600 pounds and a maximum payload of 5,150 pounds
- Offered in three cab styles (regular cab, crew-size cab and mega Cab) and two cargo-box sizes (6-foot-4-inches and 8 feet), single and dual-rear-wheel configurations
- Integrated trailer brake controller
- Available in five trim levels – ST, SLT, TRX, Laramie and Power Wagon
- Exterior styling differentiates light-duty and heavy-duty models with unique grille, hood and bumpers
- B20 bio-diesel capability available to fleet customers only

2010 RAM 2500/3500 HEAVY DUTY SPECIFICATIONS

2010 DODGE RAM HEAVY DUTY 2500/3500 SPECIFICATIONS

All dimensions are in inches (millimeters) unless otherwise noted. All dimensions measured at curb weight with standard tires and wheels.

GENERAL INFORMATION

Body Styles	Regular Cab, Crew Cab and Mega Cab
Assembly Plants	Saltillo Assembly Plant - Coahuila, Mexico
EPA Vehicle Class	Standard Pickup

ENGINE: 5.7-LITER HEMI® V-8

Availability	Standard on 2500 Series Models(a)
Type and Description	Eight-cylinder, 90-degree V-8, liquid-cooled with Variable-valve Timing (VVT)
Displacement	343 cu. in. (5654 cu. cm)
Bore x Stroke	3.92 x 3.58 (99.5 x 90.9)
Valve System	Pushrod-operated overhead valves, 16 valves, hydraulic lifters with roller followers
Fuel Injection	Sequential, multi-port, electronic, returnless
Construction	Deep-skirt cast-iron block with cross-bolted main bearing caps, aluminum alloy heads with hemispherical combustion chambers
Compression Ratio	9.6:1
Power (SAE net)	383 bhp (286 kW) @ 5,600 rpm, 2500 Series(b)
Torque (SAE net)	400 lb.-ft. (542 N•m) @ 4,000 rpm, 2500 Series
Max. Engine Speed	5,800 rpm
Fuel Requirement	Unleaded mid-grade, 89 octane (R+M)/2—recommended Unleaded regular, 87 octane (R+M)/2—acceptable
Oil Capacity	7.0 qt. (6.6L)
Coolant Capacity	18.7 qt. (17.7L)
Emission Control	Dual three-way catalytic converters, internal engine features with knock sensors ^(b)

(a) Not available on 3500 Series models.

(b) All manual transmission equipped vehicles meet LEV I chassis-certified emission requirements in California, New York, Massachusetts, Maine and Vermont. Meets Tier 2 HDV 1, 2 chassis-certified emission requirements in 45 remaining states. Ram 2500 and 3500 models equipped with automatic transmission and sold in 45 states meet Tier 2 HDV 1, 2 chassis-certified emission requirements. Ram 2500 models equipped with automatic transmission and sold in California, New York, Massachusetts, Maine and Vermont meet LEV II—MDV 1 category chassis-certified emission requirements. Ram 3500 models equipped with automatic transmission and sold in California, New York, Massachusetts, Maine and Vermont meet LEV II—MDV 2 category chassis-certified emission requirements.

ENGINE: 6.7-LITER HIGH OUTPUT CUMMINS® TURBO DIESEL I-6

Availability	Standard on 3500 Series
Type and Description	Six-cylinder, inline, liquid-cooled, turbocharged, intercooled
Displacement	408 cu. in. (6690 cu. cm)
Bore x Stroke	4.21 x 4.88 (107 x 124)
Valve System	OHV, 24 valves, solid lifters
Fuel Injection	Electronic high-pressure common rail
Construction	Cast-iron block and head
Compression Ratio	17.3:1
Power (SAE net)	350 bhp (261 kW) @ 3,000 rpm
Torque (SAE net)	650 lb.-ft. (881 N•m) @ 1,500 rpm
Maximum High-idle Engine Speed	3,500 rpm
Fuel Requirement	Ultra Low Sulfur Diesel
Oil Capacity	12.0 qt. (11.3L) with filter
Coolant Capacity	29.5 qt. (28.0L)
Emission Controls	Exhaust after-treatment systems and internal engine features
